

Kent School
Middle School Math Teacher
Job Announcement

Kent School, an independent day school located on the bank of the Chester River in historic Chestertown, Maryland serving girls and boys in Preschool through Grade 8, seeks a Middle School mathematics teacher. Responsibilities include teaching four classes. The ideal candidate will have a love for mathematics, and an eagerness to share his or her passion with an enthusiastic student body. The Middle School uses resources published by *The Art of Problem Solving*. The instructor must be able to adapt and amend resources and materials to meet students' individual needs. The ideal candidate will have a strong understanding of core mathematical concepts, Algebraic reasoning, and Geometry along with the communication skills to be able to direct an inquiry-based lesson of these concepts. Furthermore, the ideal candidate will be excited to work with early adolescents and collaborate with similarly passionate educators to craft the ideal math learning environment for his or her students.

Each Middle School faculty member also acts as an Advisor to a mixed grade level cohort of students and also may have a homeroom. Offering individualized student support and conducting parent-teacher conferences is an integral part of the Advisory program.

Qualifications

- Passion for the School's mission
- Experience in teaching Lower or Middle School Math required
- Strong interpersonal skills.
- Excellent listener and skillful communicator
- Lifelong learner
- BA or BS required. Master's preferred but not required
- Solid role model for students

How to Apply

Interested candidates should send a cover letter, resume, and 5 references to Nancy Mugele, Head of School, at nmugele@kentschool.org by June 30, 2017. The position is for the 2017-2018 academic year. Finalists will be required to teach a lesson on campus.
